ABIGAIL OGONE RAMARUKURU

IT Internship Candidate | Network Security & Computer Forensics Student

Gaborone, Botswana | Phone: +267 73180489 / +267 72601463 | Email: abigailramarukuru@gmail.com
Portfolio: abigailramarukuru-a11y.github.io/portfolio-website/
GitHub: github.com/abigailramarukuru-a11y

PROFESSIONAL PROFILE

Motivated BSc Network Security and Computer Forensics student at Botho University seeking an IT internship to apply foundational skills in programming, networking, cybersecurity and digital investigations. Hands-on academic and personal projects include a Python/Flask hospital queue application, a C++ resource loan system and a multi-site Cisco Packet Tracer network. Interested in software development, ethical hacking, web technologies, network analysis and digital forensics.

EDUCATION

Botho University, Botswana | BSc Network Security and Computer Forensics | 2025–Present

Fourth semester begins January 2027 • Expected graduation: 2029

TECHNICAL SKILLS

Programming & Web: C++, Python, SQL, HTML, CSS, Bootstrap, Flask; JavaScript (learning)

Networking: Cisco Packet Tracer, IPv4/VLSM, VLANs, inter-VLAN routing, OSPF, DHCP, ACLs, SSH, Wireshark

Forensics & Systems: Autopsy, Volatility 3, Windows Event Viewer, Kali Linux, Linux command line

Development & Data: Git, GitHub, SQLite, Code::Blocks

SELECTED PROJECTS

Hospital Queue Management System | Python, Flask, SQLite, HTML, Bootstrap

- Developed a web application prototype for registering, finding, updating and serving patients, with department-based queues.

github.com/abigailramarukuru-a11y/hospital-queue-app

Technology Resource Loan Management System | C++

- Built a console application to register equipment, issue and return resources, search loans and report usage statistics.
- Applied object-oriented programming, arrays, structures, pointers and input validation.

github.com/abigailramarukuru-a11y/cpp-resource-loan-system

Cisco Routing & Switching Lab | Cisco Packet Tracer

- Configured and tested a multi-site network spanning Gaborone, Mahalapye and Palapye using VLANs, routing, DHCP, ACLs and SSH.
